

**Ex No : 7 b****Date:**  
**20/02/23****Implementation of Live Migration using Xen Server****Aim:**

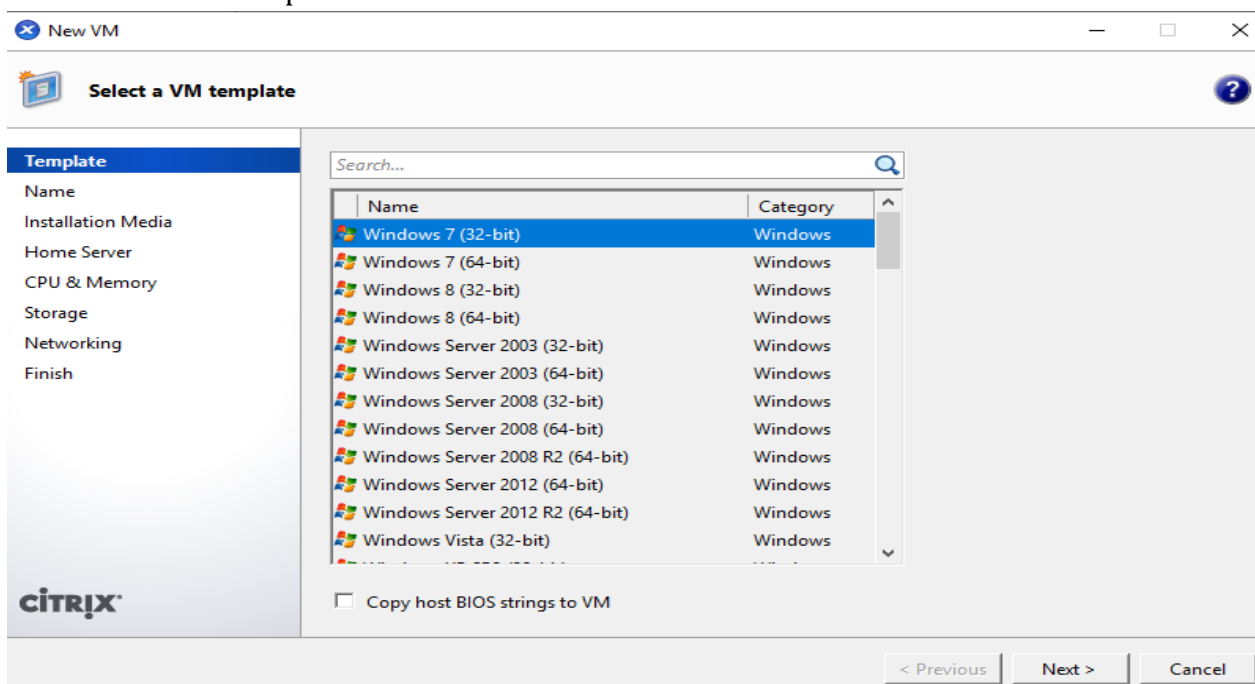

To implement the Live Migration using XEN sever.

**Procedure:****1. Connect to Xen Server.**

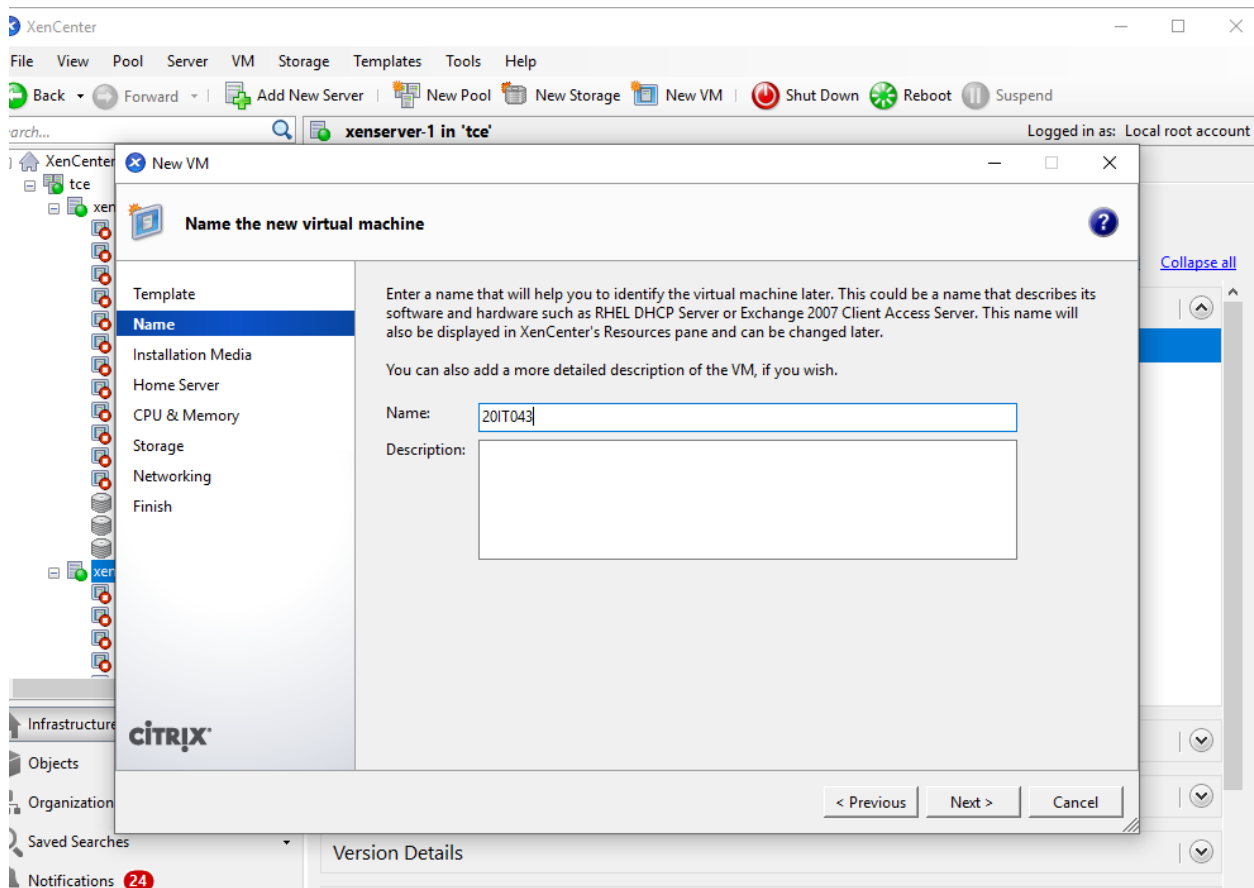

2. Right click of the xen server and select new VM.

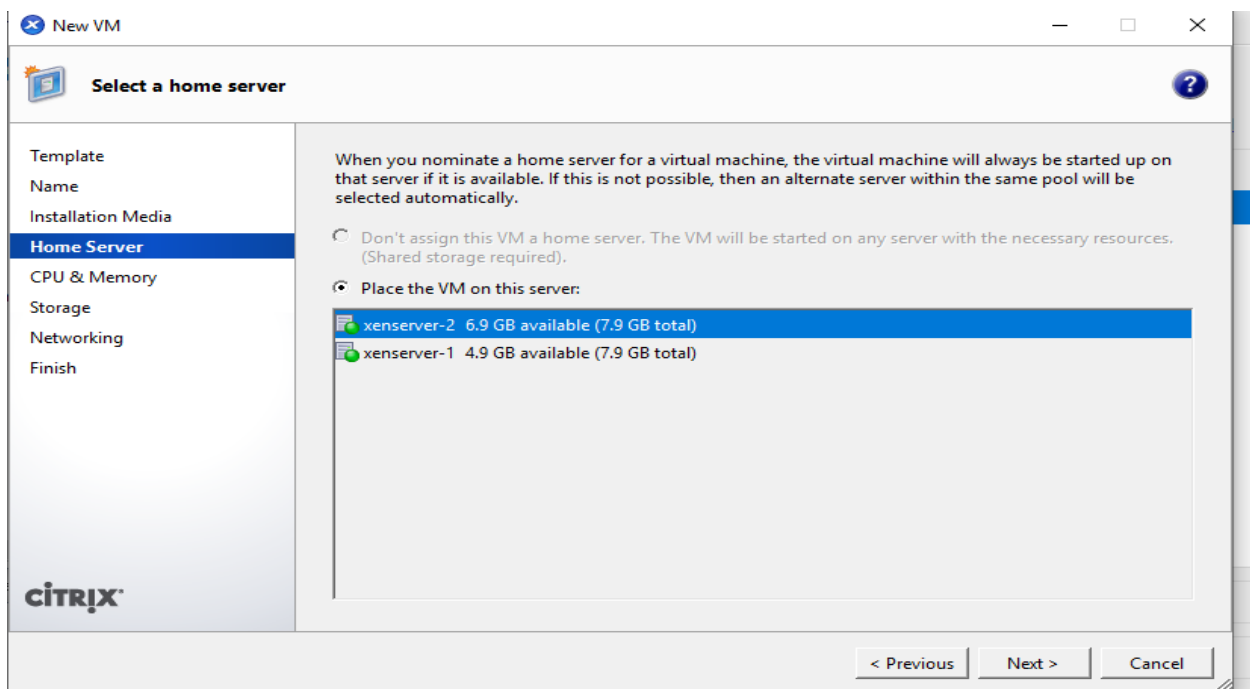

3. Select the VM template.

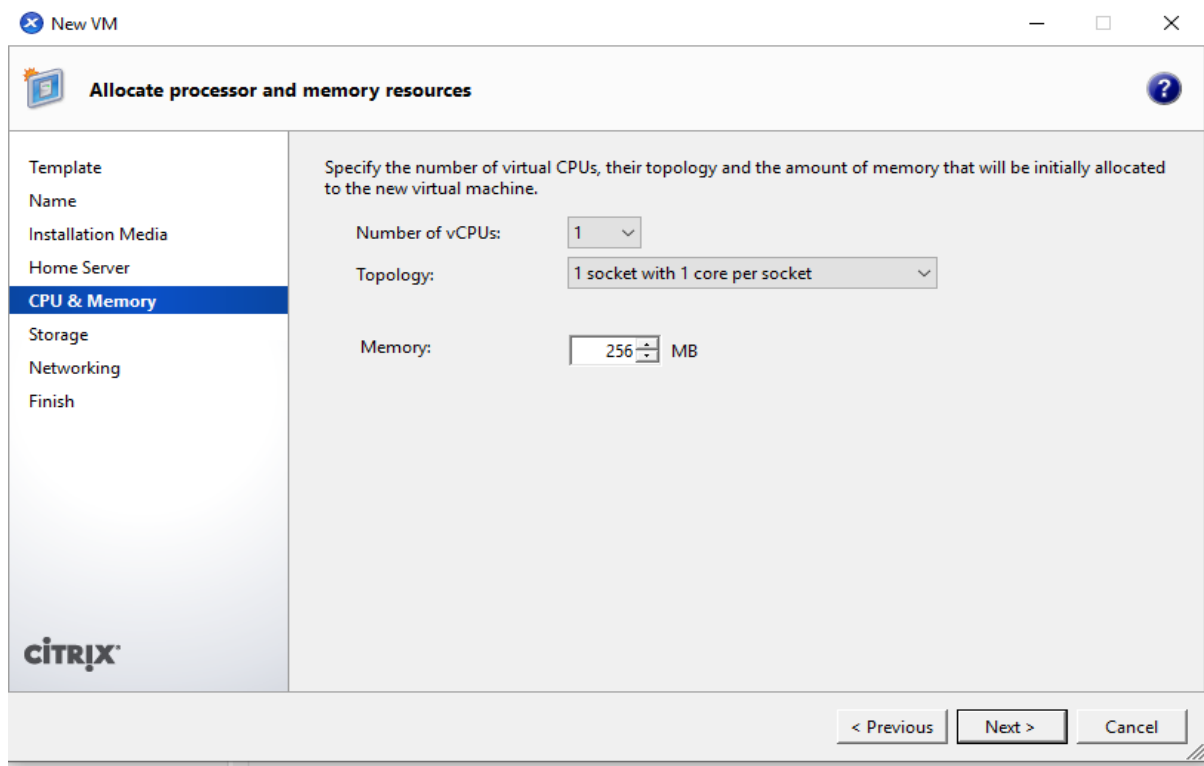

4. Provide the name for the virtual Machine and click next.

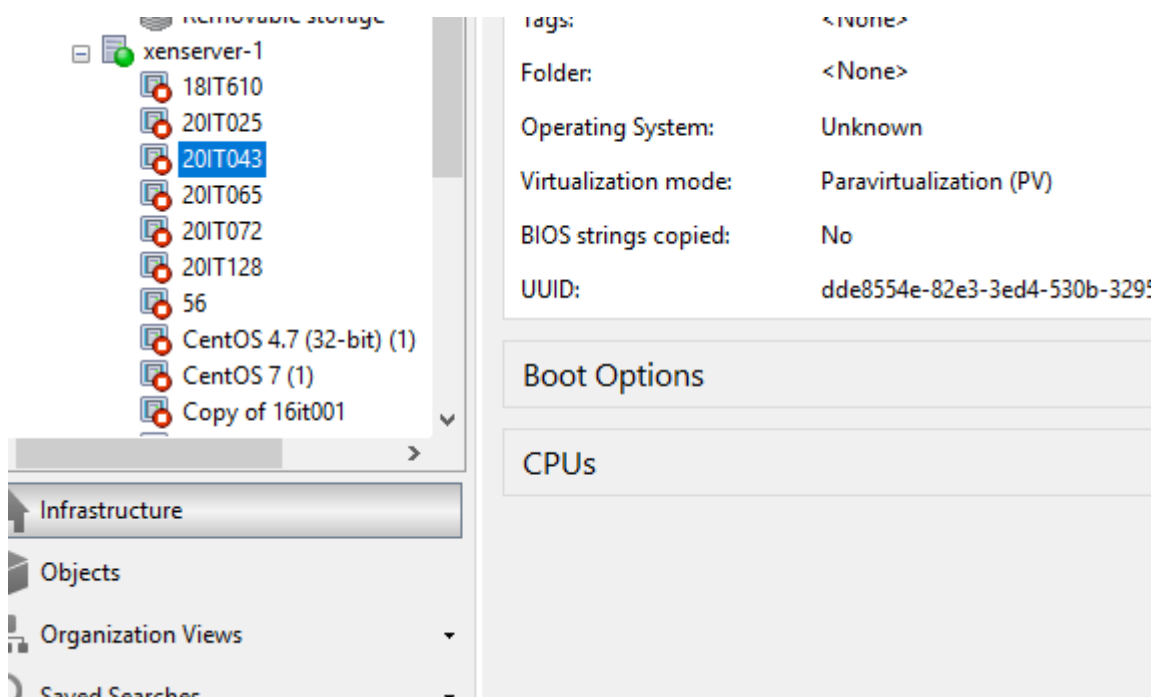

## 5. Select the server

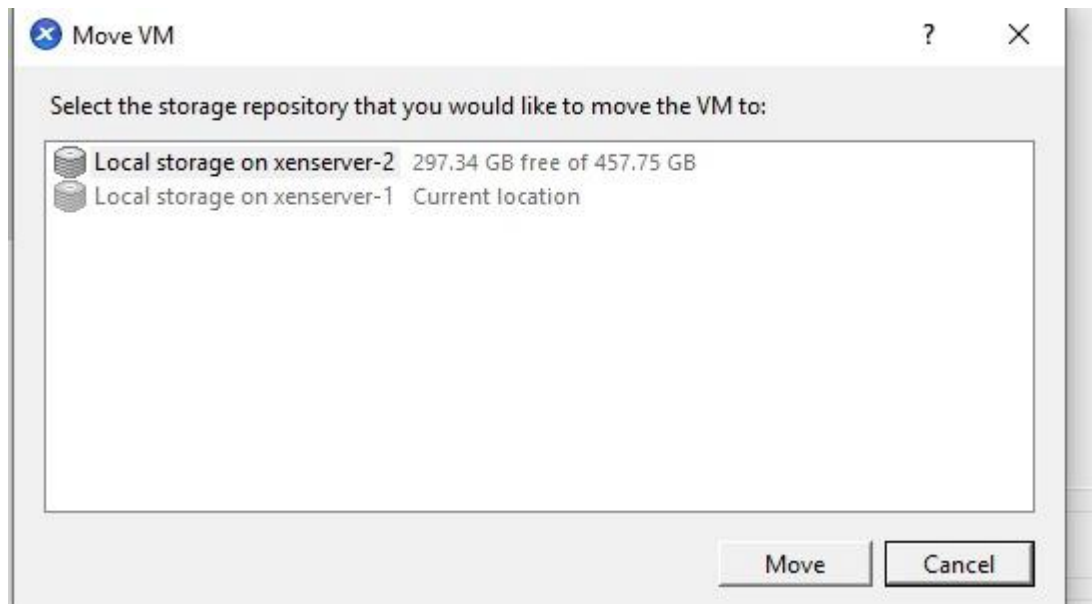

## 6. Click next and finish setting up the virtual Machine

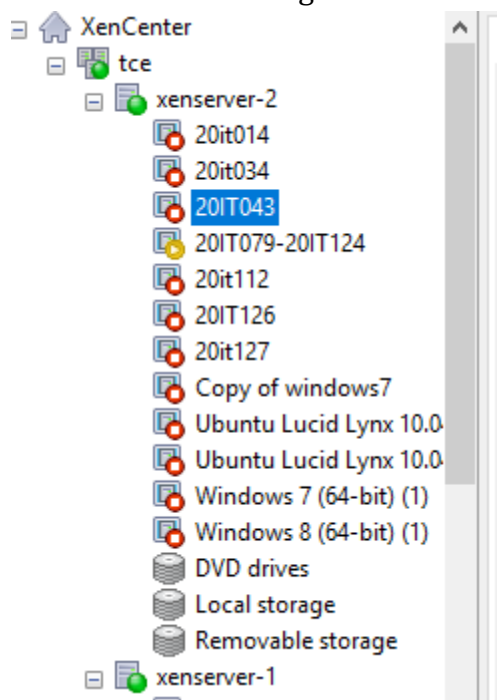

7. Now the VM is created on the server. Right click and choose move VM.

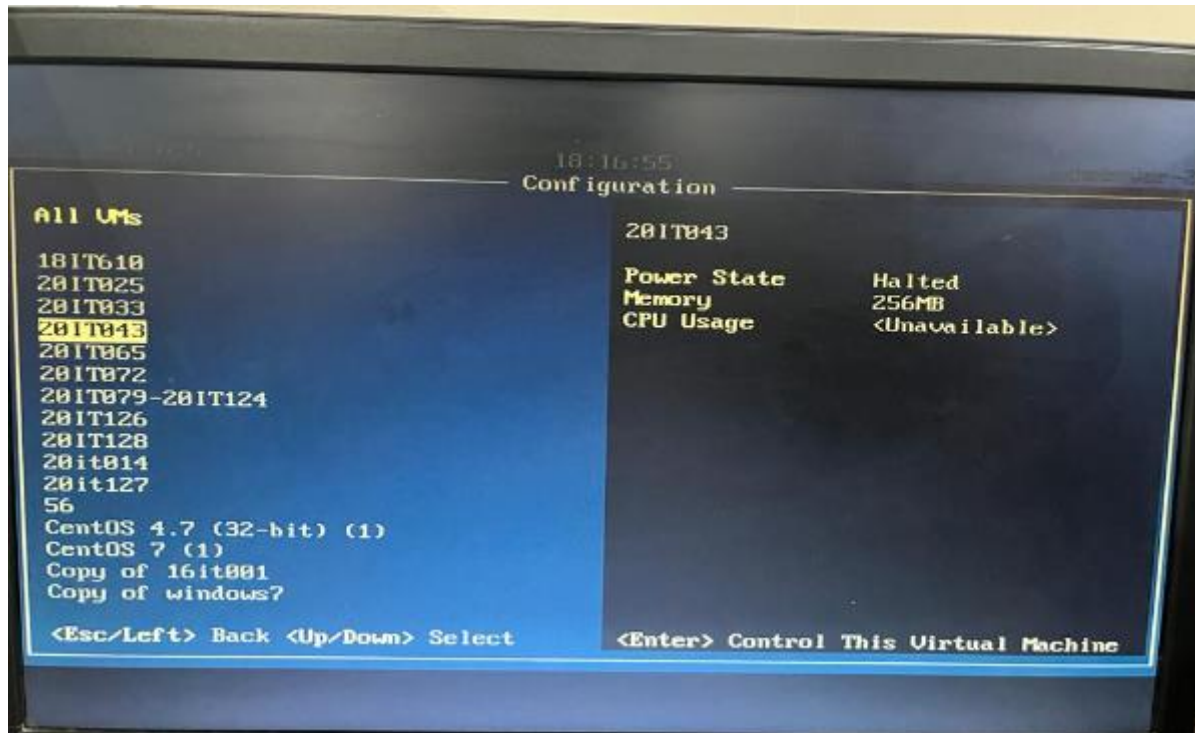

8. Now choose the destination server and select move.

1. Now the VM is migrated to another server.

9. Finally we can view the status of the migrated VM in another server

**Result:**

Hence, Live migration is implemented and Virtual machine is migrated using XEN server.
